1.0.5

Released 17th May 2021

● Bug **WYSIWYG**

When inputting text (course creation) into the system, the output (ie) preview and the course itself should be exactly the same. Specifically, font name, font colour, font size and spacing in particular (WYSIWYG)

● New **Tidy up**

New layout has been applied to the "Write a course" properties section. Tidy up

● Bug **Course Ticking**

Corrected the All courses ticked so all courses beneath it are also ticked.

● Bug **Incomplete Question cannot be saved**

You cannot save a question if you have not indicated which is the correct answer.

● Bug **Hours. Positive numbers only**

Cool-Down time can no longer go into negative.

● Change **Delete unnecessary message on publishing**

Continuation message has been removed when you publish a course.

● Bug **Order in is order out**

The order in which you inout the statements or answers is now preserved from Admin to user.

● Change **X axis labelling shortend**

Reduced the description on bar graphs from 15 to 10 characters.

● Bug **Uninterrupted course when module deleted**

When deleting a module in the course creation, the published revised course stops before the deletion. This has been rectified.

● Bug **All properties preserved when duplicating course**

When duplicating a course, the course recommended time is NOT set back to zero but is also preserved. It is however editable before the duplicated course is published.

- Bug **Admin dashboard shows correct stats**

  Admin Dashboard with incorrect graphs, is now showing correct graphs.
